

12 Aug 26

Welcome fresh beige is from Zweydigger pradical ragmatist decrecently
unknown has Mr. Shingles
diagnosis of floatingmouthbelief
psychoanalytic pre-radical pragmatism, tumid pre-search into the re-
pre-enactive
see how we already meat the forgotten proto-empirical world
the world is a meatfaced forum
experience flowing worldface
expectantly yours
the world is chase and evasion
deep shape is care
i totally and actually really give a fuck
to put the floating mouth back on the neck
prejudice is not delusion as bad mirroring
prejudice is the specificity of a dance of meatboy
antirepresentationalism is not a representation of the failure of the
mirror metaphor to mirror the "external truth" about "truth"
post-truth pragmatism poetic phenomenism
positronically indicative that the sign is noise of breath
stain of finger
the stain of finger is itself a "finger" & the finger can be a sign

12 Aug 26

PREJUDICIAL COMPORMENTS

phil is "serious business" in the "seminary for research into the trans-
empirical"

philosophers use words that "mean" the "truth" of "objective
reality"

blindly enacted generalized mathemagical platonism neath the glow of the
idol of Logic

this is mouthbelief "logic" -- computing w/ crypto-divine trans-emp
Essences

the indicative rhetorical critique of floatingmouth dis-ease is not
a refutation of its "axioms" or "theorem" within its own floating mouth

floatingmouthbelief is not (called) "false"
absolute empiricism is not presented as "true"

the signs "true" and "false" in the floating mouth are "the problem"
epistemo-theology of the trooth-banker

for mr shingles this is not a spiritual-political krisis
but poetic self-assertion

Xphil is "xxxxx honest poetry"

"I am serious as an artist trying to add the right next link to
the chain."

He is "Zweydigger" bc the creativity is xxxx tonal phonemic & basted
in English. He hopes/wants the depth of "content" of a "real academic
scholar" in a more appropriate (coherent) "form"

"I flunking love Hobbes"

He also loves moments in C S "purse"

"I expect to be under-rated at first in terms of the prejudices my work
tries to point at. The academic caution --- its poorpale praphrasing ---
smells like a pseudo-physics on the level of style. So much school-
prose is gonk from the same re-assembly line. Fear of poetry is future fear.
the burth of spirit from agency. spirit or "spurt" is a hunt wipe
leap of free them. the "agent" is the most of even the moister meatboys.
prejudicial meat-basis pre-fore-taking has

Sweidorf saw the "honesty" of "we are rival poets." He thought maybe drop the pretense. "foolosophy after Heidegger" is not your granfathers & technology. --I confess to my fellow vainglorions that I am not only trying to steal your light but maybe found a lever over here. This is not "outside" the "objective situation." You meet me as fool or brother or rival. A younger man can tolerate my "virtue" in terms of his plan to go beyond me in the long run. And this is beautiful. Generational. The old dogs are deaf to new tricks and deaf dogs are forggot en. All the dogs die, but many of them sniff at the dream of a mattering mark they can sign and leave behind.

My "shamelessness" is idiot-shrewd courage, maybe, for courage ~~ix~~ swims against streaming fear,

I am no-where without the tradition. I am specifying a goreblurry scents of the necks move. I see Derrida as adjacent. I know less rather than more than him. He demonstrated the overcoming af a prejudice concretely. He found a lever. What can I "add" after Derrida? I work in the wet pho-nemic elay of Ing-lish. I am krood and stupit --- an outsider giver of online fireside chats which is "disreputable" bc "real foolosophy" is a "special sort-of-science" that "experts" do. This prejudice is my friend, unless Heidegger as Bukowski on LSD is already claimed. It could be. "We" are too marginal to be conspicuous. I have searched now & then for the combo I purvey, didnt find. Headshop nonduality, earnest seminary Husserl gossip, earnest Heidegger in the academic-techno-physical jargon. Most meet "famous thinkers" as "substance" rather than "possibility." Insufficient Xaudacity. It suffices to be "in on the ~~ix~~ latest thing." Now I make an exception for QBism, which is close to my own prejudicial reportment if safely academic and grounded in difficult math.

"It is only sm kind of poetry." Yes. Tho this "only" is the folly of floating Xmouth bleaters. "theory of the leisure class" yes and its relation to that tranempirical postpeotic research in the reseminary. Kerouac is over there. My "rational investigation of qualia" is over here, with Newton. Yes, I say, with Newton as occultist.

I yawp forth a greasy ~~ix~~ "jazz" and call it "pre-search" or "brontocubism." I enact grokking the "essence" of Plato, tho I am far from expert exposure. Like dudes I can just "see" what the fuck he was getting at. At the same time Plato can dunk my sick. No authority. No "truth." Only a "projection." I can "see well enough" (from "here") the continuum from Clitus to Derida This blind vision is a risk, a helpless panting pointing. No substance. All is hebel. All is breath. All is vapor. All is breath like the breath of moments of a "sound idea." post-structuralist reactionvery Platocubism. The shound idea kid sall in thair

12 Aug 26

~~rotodramatic~~ depositivism

rotopragmatic protodramatic ur-science

floatingmouth theorycc "logi"c est logick

Carebottom, carebasis. The world is "care" is "yime" is "for primate me"
floatingmouth say care is "inside" but real is "outside"
seminary objectivity is giving a fuck about not giving a fuck
"primate empiricism"

I type this in shack need more flashlight. ageing eyes, clear frame
glasses need update lenses. I care to see the royal make "dream" here big
star "philosophy" special meat boy.

Of endangered flesh the prejudicial comportment sang. Of conch is nous
as the "being" of the world in a for-meat fashion. In a for time-binding
expectant meat boy fashion showing. time-blinding. binding is ~~blinding~~
blinding.

the specificity of expectation implicitly exclusive. flesh cares. in other
worms, flesh acts "now" (bloody hands on stone) for "later." mr shingles.
type now hope great reward much famous. mr shingles ok poor more time do
"art" great reward much famous.

the "objectivity" of the primate is the temporal penetration of bias --shrewd
subjectivity.

the sign "reality" in the "blood world" refers to future. a prejudice is
"objective" thru its "power"

"power" is grounded in "care"

"power is knowledge" because care remembers what feels good. "feels good"
is a formal indicator. like "care"

~~apaxxx~~

the floating mouth seminary is blind to its own "care"

floating belief is body-blind

"knowledge" is (roughly). venerable prejudicial comportment. the mouth
belief is mouth warranted in a more or less body-blind "logick"

"around here we go like this"

the problem of the criterion can be deciphered as a pointer to self-blind
basis. thrown projectiles.

psychoanalytic pragmatic brontophenomenology tries for "self honesty" &
"therefor" not "aperspectival truth."

honorific "reality" is grounded in "care" that is "organism local" as a
first approximation. world-for-meat is "personal" yet a "person" is a
co-enacted meat-meme. mr shingles be much famous need others. poet chain
signs for others. because "I" care how other meat care "I" take the
impersonal (trans-personal) personally. I act w/ bloody hands in the now
for recognition later. "of course" but the "physics mystic" carefully points
to "objective reality" beyond the realm of care. The mystico-physicist is
a poet of the unreality of poetry.

"So I get that like genuinely reasonable not-really mystics are just
confused on this stuff. They enact tired memes blindly. The brochures dazzled
them. A tacit mathoplatonism seduced them. I was confused on this issue myself
but by chance more of an instrumentalist ironico-cynical type. Way back I
think I vaguely but certainly was caught in science as theology but I mostly
obsessed over persona and claims on authority. I read the "evil" thnks.
So I was "prepped" to findly fit the pieces together. I see Mach as even more
relevant. Cses is "being" of "world" for future-oriented organism make science
tool control oncoming environment."
