temporal navigation of "quality" esp "value" & "disvalue," existenz is preferential vectorial disclosure. "world-face" is "phenomenal feel"

floating mouff belief is quadroplegic armcheer stuporscience (blooper signs) This "mirror logick" is "act-blind." I enact the same "forum" as I mouth-doubt it. I "am" the "care form" in my deafness to the sounds that point behind the content of the question to the "blind faith" in act.

seminary truth man wants proof that there is "as already together here" he says "prove that you can hear me."

other wise the theologickal appropriation of depositivism sidesteps its other wise wounding point. an animal is always "subjective" so you dont get your 4D Truth Crystal. "I am see now the \$XX 4D troof clystal." "I am say now word of Got."

"I am conjure the mystical ultra-physical." I am see from high above. The trope is astral projection. Some are just lost in the blur. My signs may offend toward an eventual gratitude. "So THAT is temporal depth."

Mr. Tryd rff of adventurous prayer-a-phrase is footnope to Heidegger & Platoelitus & C S Purse & Mach & Hobbes & Joyce & Burroughs & ... "Care-form is nassy, my fiends." The glitter of pussy & gore. This male of piss is reel, my gx fellow yellow river boys.

Our preferential prejudice for the battle-tested is pre-sub-rational. The "milk" of gnawlege is bottle-tasted. Oncomingly specified I clash w/ clunks of "digitized" chora-gunk. That little queen over there is jesus pleases for the mount. wherefor put the trace of gods go my. our randy pragmaticyst assembles chains of signs that hopefully go to enact and show the temporal depth they paint at.

He gives a below-the-neck-ology of technology. The tooth is in the putting. The poof is then the pudding. Reel in the floating mouth. Put your mouth with the unrest of you. Heidegger is only "profound" as two feet almost finally on the ground.

Consciousness is "presence" of "world-face" organized by hope & fear -- to eversamplify. The "continuum" ("quality") is "brown-ness" of the penny brown penny brown penny. But not the "sonic quality" of the saying of the sign "brown." The "continuum" (chora) is the underflow "how of being there" that is speakable as "pain." A thing is there with temporal depth as a synthesis of "quality." My "looped-ness" in her hair is her "quality" of beauty sin the eye of let me hold her. The must-be-mine-ness of little miss brown penny is the "value component" of her "pre-conceptual sensory un-stuff." The problem with saying it is that it is "too close" & "too simple." As if always already enacted. To "is" is to hide/show for the thing has temporal depth. Bite the thing like a coin that may prove false. You will not taste the "idea" of the coin but you enact it. This page for you now is littered with unities (words). The "stuff" that is "gathered" is "optical quality." The thing (this or that word) is "blind-faith enacted" as "enduring" and "in my shared environment." The "seen thing" is --- except for floating mouth piously feigned belief --- the "shared with others" thing. The "quality" is "part of the thing" not "inside mystical ghost space stumff."

Point at the enacting-at-now "temporal care structure." The on-the-way-ness or "kinesis" of your reading this. The suspense and resolution of music. Schopenhauer & Hobbes. Desire and fear. Operations in perceptual quality to control oncoming flux of that quality primarily in terms of its "value/disvalue component." Bloody hands now for feet up later. Suppress rage now for no prison later. "Of course." Then mouth floats away again from this core empiricism which demystifies physics as battletested hardware in the temporal field of value. I build a machine that serves as an analogy for stuff in the world I care about. I act on the output of the machine. I risk life and limb on this numeral

mr. shingles say plato unwritten give too materialism. against intense-ly "mathemagickal platonism"

sauss ures "~~sound~~ idea" is "form not substance" or rather the slippery open-partial specification/synthesis of sounds that "count" in the (ur-)empirical world as sayings OF.

The physo-mystics flee to numbers, hide from the numeral. The logical ~~platonists~~ presuppose immaterial meaning, presuppose "truth" in terms of "meaningmirrors" and hide from the soundimage. or never that to bother to look down.

many start from these mystified empty sounds, the ~~logical~~ fi zzacle of the floating lisp. the "truth" that is out there. "truth" mystifies "seeing is believing." and endorsement of comportment. the game is built on pure spectation. but vision as specified is blindness and ~~logical~~ bias.

~~panopticon~~ panopticon, "i am see from all where at once. i am see from all when at once." he has caught the world in his mine-stuff.

but I & Hei. & Hobbes also sniff for the "form" of the world. Even caveman pragmo visceral pre-theory is expectantly yours. so Platonitus gives us Protagoras. onto-clue-vision. "No truth" is no truth. Life is risk. The "repeatable fussy gnosis" is always also ~~personal~~ personal self-assertion. proptopragsmatism is a helpless pointing, enacting in signs the blindfever hope they point at.
