esoplatonic insignia, thingtheory, depth ontology

the "thing itself" is the "idea" as "synthesis" of "differencings."
the specifity of the-thing-from-here-now (the quality) excludes
the specifity of the-thing-from-there-later (the "ineffable quality")

"stream of x-perience" is care-deep "worldface" organized by fear
and the over side of the "coin" which is desire. temporal care depth
Xis value-quality & disvalue quality. buy & install a smoke detector you
know you love your kids.

the "Ffroid" part is "self-honesty." I care how others see me. I "live"
my blind carnal faith that world is forum. dramaturgical ontology. all the
world's a stage. I assert my self as "worth hearing." perhaps in terms
of "mirroingxing" a "true reality" in chains of letters for primate eyes.
but perhaps in terms of "radical pragmocubism." the ~~xxxx~~ "deep" form is
"I am value." this sign "value" like "quality" tries to point "below"
the passing topical "surface signs."

"proto-empirical world" is "forum-for-specified-primate"
pre-empirical world is stage
to ask for "proof" is to remain self-blind, self-deaf --to enact the stage
already, to perform on the stage, to chase an ideal image-for-others

saussure's "acoustic image" is a sensory sound idea, localized esoplatonism
goodmans's "chracter" is a sensory scribble idea

we chase or flee the future in the deep of the thing, the deep of the
thing as here as promising more

I "aim" this Royal at the glory that waits for me maybe. I aim
at a view from the grave of myself as worth remembering. I haul out this
rickety rig at 5AM to a shack in the back yard to type under flashlights.
Thee now in which I am "no one" is suffused with possibility. I am
"actually a genius" (maybe) because "the ideal future community will see
it."

The agony/ecstasy of the sign's temporal depth, each moment of face of
the sign with historical (and so personal) "significance." The toxic gift
