chumps of kwality w/ temporal depff ontofragmism, brontological claws-

consider thou the carbon monoxide alarm. i knew a girl who died at 17 with
her new boyfriend in a basement from CO fumes. the animal "is" schemeing.
consciousness is unvelt-for-caring-schemer, navigant of the deep in things as
mattering things. "fear is every man's portion." reel of portion.
the past & future both encoded as one in the specifictity of the vector.
"words move, music moves / only in time." To read this sentence is to
remember-expect. the on-the-way-ness which is "remembering." but also
around-the-cornering.

I run into grandpa at the grocery store. he is "there" as familiar grandpa.

I say/think nothing but walk trusting toward this dear non-stranger. the
"past" is there in what I am "toward." this "past" is the specification of my
ongoing visceral approach deeper into the dynamic situation. I adjust the
spurt of my saxophone, controllingly responsive to the situation.

the creek is having it sway.

the priority of paraphrase as pair a phrase. wet klay of phonemes.
no atemporal essence crystals. the "music" of words does not scrape off.
role-equivalence is not transmateriality, a ghost story for the usual anti-
empirical flakes, for whom mystification is the point. mathemagickal platonism,
bongfumes handwaving, continual suppression of what is just there if we
bother to cneck. the envelope is the letter, tedious idolatry, footnotes to
long disabused self-amused confusions. love letters to pipe dreams offered
as "science" of "external ompjective troo reality" by yet another dying
horny status-sneaking primate. the others are "trapped in qualia." I sit
with God above time. I enact flowingly with the time I "am" the imposition
on others that my ongoing game with symbols has "compressed" time into a
frozen (un)real number. Because I can crank out the symbols for Av (move from
coordinate system to coordinate system ina game), I am become "god" above
the "matrix." I am blind to the ground of the game in care. Models are
tools that viscerally prove themselves to sex-driven primates. The cynic will
tell us that impositions of "atemporal visions# on the forum are on-the-way
status-SEEKING self-assertions. "Admire me. Admire me. Admire me."

I too --quite frankly --- assert myself as admirable. I even (of course)
X"battle against time" as "poet" of the enduring constant "form" of the
fluctuating world. I search for pointers to the ~~stasis~~ stasis in the dynamic.
the relatively fixed "shape" of the river's ever-other-ing waters.

mesoteric doctrine of dr. tryglorff, mutilator of Plato. thick point on a

I slop on my gnew little brick. The toof is in the putting. Boneless chunk

Soap in storm chunk. He gave her a wonderful filling. Golden ruins go glad.
The edge clam sang of all from grays. "Fleas to me chew." He crayolas
a muted post horn for bad men only. A gland knew finish object.
Our infestigation is unconclusionary.

the doctrine of .mr. cryglorff

to "is" is to "hide-show." specified revelation is exclusive. the "idea" Xofthe thing points at a temporal synthesis. the polyply entity is a X"system of moments." glue "heads" to "tails" to get the coin. but this temporal synthesis has always already happened: esoplatoclitus is a brontologist, pointing at the brute structure of things in their thinghood.

the thing as such is not (all) there. the world has temporal depth. for heidegger (& cryglorff) the "past" and "future" are fused in the flowing "now." this is barbarically anti-mystical: the erotic revelation of a kitchen faucet. I turn the ~~k~~knob to get water. The knob is "remembered" Xby hand that approaches it with prejudice in expectation. The approach is specified (a twisting) and "toward" expected disbursal. the situation is "there" for thirsty prime. "consciousness" is the "being" of this situation in the sense of "presence" as being-FOR a specified primate. Mute value-quality of "thirst," tactile feel of knob, color and shape. But "already things in spatiotemporal context."
