"primary time" is there-form as care-form -- the animation of the animal,
world-for-animal as prejudicial continuous collision w/ gonecoming "future"
that is "here" in how things are "present-for" ... the chunk of lusty hopefear.

the 4D troof clystal is rhetorically "imposed" in the blind enactment of
the pre-empirical forum that the krystal floatingmouth demotes to ~~epiphenomenal~~
loser interface. epiphenomenal

The sign "time" is taken to point at numerals on clocks. That clocks are
tools is suppressed. The tool is "more real" than the on-the-way care
that recedingly "grounds" it. The on-the-way care, immersed, is the "seeing"
that is not ~~self-same~~ "seen."

a gory primal realism is mis-heard as mysticism by the mysticism it
tries to point out. "rationalism" is what this counter-empirical krystal-
theory calls itself

empiricism has no "justification" in euclidean-theo-logie. we "are" empiricism.
we are feedback-updated prejudicial disclosure of "umvelt" that is (of course)
"troo reality." but the "troo" is "yoo." the primal streaming brute fact is
"yoo reality" as temporal navigation of thing-ize "quality."
what "matters most" about this quality is pain/pleasure in a very open
sense of both words --he dies to save his child

not the ~~xxxxx~~-theological "physical" but stinky stepfather shit that
crystal-
refuses to be flushed away. this is the hand lopped off at the machine
shop and screaming spurting agony. this is the give-a-fuck physical,
the primary primate terror-~~xxxxx~~ecstasy "physical"

but this sign "physical" has been "stolen" by theologians who think they
are Einstein --- the confusion is innocent & earnest. it "feels" like
"real talk" because it "is" in the sense of their personal care. The "real"
is "personal" in this sense. I direct my signs to others in the "faith"
that they "care" as I do. The "truth as mirroring" metaphor "enacts itself"
precisely as a "dance" that is the subverbal hobbling basis of what is
verbalized. the "hard problem" grows from the "dark soil" of an eneacted
metaphor-prejudice, likewise the mathemagical "platonism."

I do not call it "false" from within the metaphor I point out as optional
I excavate, pull subverbal belief up the neck and into the floating mouff
this is not presented as "the right path for all," for this is another
prejudice, that signs must bring a "law."
I toss pebbles into a stagnant pool. I "disvalue" the smell of it. I
"value" my future recognition as "a good next move" -- not the only
Xgoodnext move. My possible future value depends upon my position within a
sequence of "ontopoets." Those who dont get what had already done when I
slapped on my little brick arent my ideal jury. My style will be a
"gimmick." But they enact an old prejudice, the usual math emagical divorce
of "transempirical meaningmindstuff" from the "music" of speech. The product
is finally persona.
